SMART POWER | SMART DETECTION | SMART DETERRENCE

Intelligent Security & IoT Solutions

Shenzhen Gago Electronics Co.,Ltd.

Company Profile

GAGO is a technology-driven manufacturer of intelligent security and IoT systems.
We specialize in outdoor surveillance infrastructure, AI-based detection systems, and rapid deployment security solutions.

R&D Capability

AI Technology
Infrastructure
Global Service

Proactive Deterrence& Intelligent Power Systems

Smart Detection & Analytics

OEM/ODM Manufacturing

Business Focus

Smart Surveillance Systems
Outdoor Security Infrastructure Solar Deployment Solutions
AI Environmental Detection

Brand Positioning

Delivering intelligent, reliable and scalable security systems for global markets.

Warning System

IP Network Audio Device with Integrated Strobe Lighting for Security Applications

Proud to Connect with:

CHeKT · 3deye · immix · Network Optix · TVT · uniview

And More...

IP Strobe Speaker SS11

The GAGO Strobe Speaker (SS11) is a professional IP audio and visual notification device designed for modern security installations.

Combining a network speaker, RGB strobe lighting, two-way communication capability, and flexible installation options, SS11 provides security integrators with a reliable way to add audio interaction and visual alerts to existing surveillance systems.

Designed for indoor and outdoor environments, SS11 offers a practical IP-based solution for security projects requiring remote communication, alarm notification, and system integration.

IP Strobe Speaker SS20

Gago SS20 is a professional visual and audio notification solution designed to improve safety awareness across industrial, commercial, and outdoor environments.

Combining powerful flashing RGB indicators with high-output audio capability, SS20 provides a highly visible and audible warning method for situations where immediate attention is required.

Designed for safety management, operational communication, and security notification applications, SS20 helps organizations deliver clear alerts across large areas and challenging environments.

IP Strobe Horn Speaker SH40

Gago SH40 is an intelligent network-enabled warning solution that transforms surveillance systems from passive observation into proactive security response.

Instead of simply recording security incidents, the SH40 enables organizations to immediately notify, warn, and discourage unauthorized activity through synchronized audio and visual alerts.

Designed for modern security operations, the system helps shorten response time, improve situational awareness, and strengthen protection across commercial, industrial, and outdoor environments.

Warning System Applications

Perimeter / Residential / Commercial / Construction

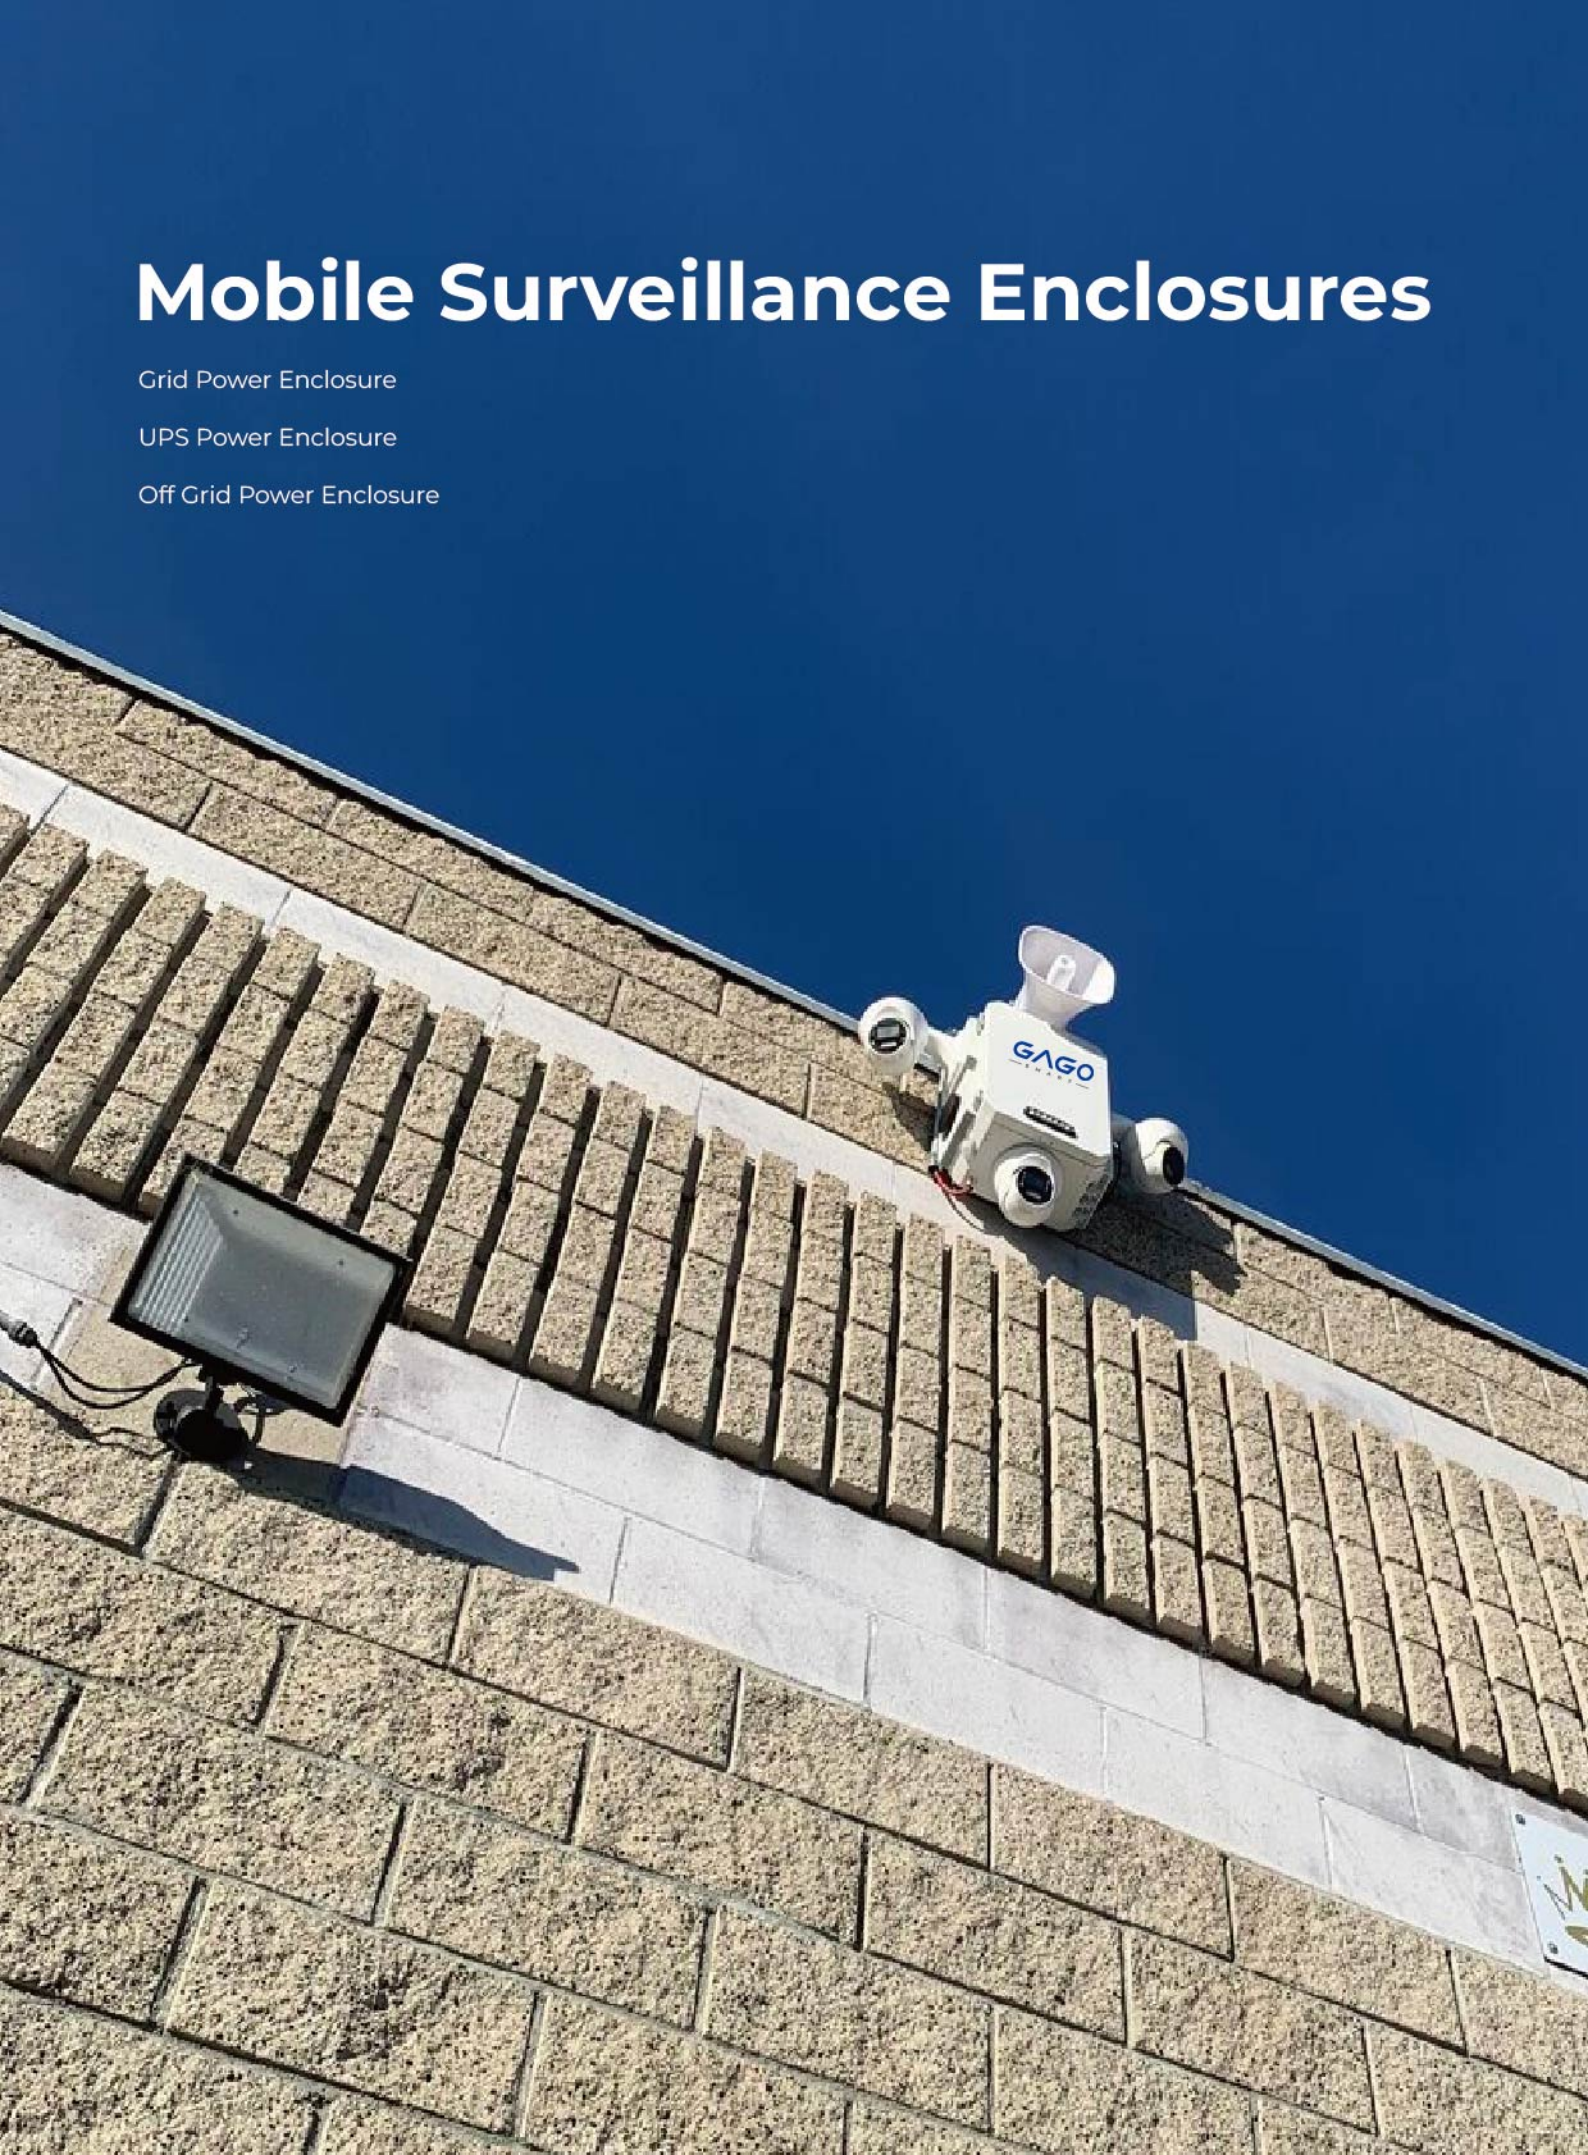

Mobile Surveillance Enclosures

Grid Power Enclosure

UPS Power Enclosure

Off Grid Power Enclosure

Grid Power Enclosure EL-CA

The GAGO Grid Power Cabinet (EL-CA Box) is a compact outdoor power enclosure designed to provide reliable AC-to-DC power conversion for modern IP surveillance deployments.

Supporting 110–264VAC grid power input, the EL-CA Box converts utility power into stable 12VDC and 48VDC outputs for powering PoE switches, routers, IP cameras, and other outdoor security devices.

Grid Power Enclosure DD2

The GAGO AC Power Enclosure (DD2) is a professional outdoor power management cabinet designed to provide stable and flexible power distribution for IP surveillance and networking applications.

Supporting AC90–264V input, the DD2 converts grid power into multiple DC outputs including 12VDC, 24VDC, and 48VDC, providing reliable power for cameras, PoE switches, routers, communication devices, and other outdoor security equipment.

UPS Power Enclosure DD4

Outdoor AC Power & Edge Security Integration Cabinet (DD4 BOX)

The UPS Surveillance Enclosure (DD4 BOX) is a professional outdoor power and security integration cabinet designed for surveillance systems requiring stable power supply, battery backup, and edge device installation.

It integrates UPS power management, battery storage, NVR hosting, and AI deterrence system support into a single compact enclosure, significantly simplifying outdoor deployment for modern security infrastructure.

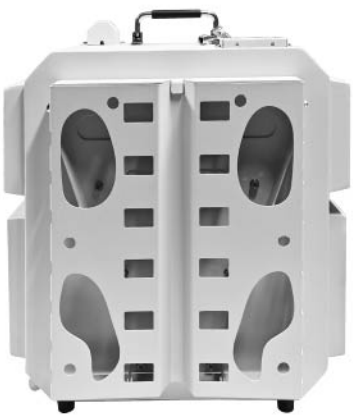

UPS Power Enclosure DD4-360

The GAGO UPS CCTV Box (DD4-360) is a compact outdoor power enclosure designed for modern IP surveillance deployments.

Unlike traditional UPS cabinets that integrate large backup batteries and local recording equipment, the DD4-360 provides a flexible power platform that allows system integrators to select their preferred battery capacity according to actual project requirements.

Off Grid Power Enclosure DD3

The GAGO Solar Mobile Surveillance Box (DD3) is an intelligent hybrid power solution designed for outdoor surveillance systems, smart poles, and remote security applications requiring continuous power availability.

DD3 supports AC 110-277V & solar panel inputs simultaneously.

With Gago own designed ETL certified PCM, AC and solar input channels will be auto-switch, and built-in 22.2V/126Ah battery can be auto activated. Users can do remote management and maintenance via Victron VRM freely.

Off Grid Power Enclosure DD3-V3276

Maximum Energy. Compact Design. Seamless Integration.

- Higher Battery Capacity
- Same DD3 Compact Size
- Optimized Internal Space Design
- Reliable Off-Grid Surveillance Power
- Designed for Milesight OpenVision Cameras

Off Grid Power Enclosure

DD3-V5600

More Power.
Easier Installation.
Extreme Weather Ready.

- 5600Wh Battery Capacity
- Up to 1200W Solar Input
- ETL Certified Power Module
- Fast-Install Modular Battery Design
- Built for Harsh Outdoor Surveillance

Off Grid Power Enclosure

GE2 ALL IN ONE SOLAR BOX (Free Solar Monitoring Cloud)

GE2 All in One Solar Box is an economical and practical solar power solution designed for outdoor surveillance applications where reliable electricity is unavailable or expensive to deploy.

Combining battery storage (2000Wh) , solar charging, PoE networking, DC12V outputs and RS485 into one compact enclosure, the GE2 provides everything required to quickly deploy independent CCTV systems in remote locations.

Mobile Surveillance Enclosures Applications

Industrial / Smart City / Construction / Parking Lot

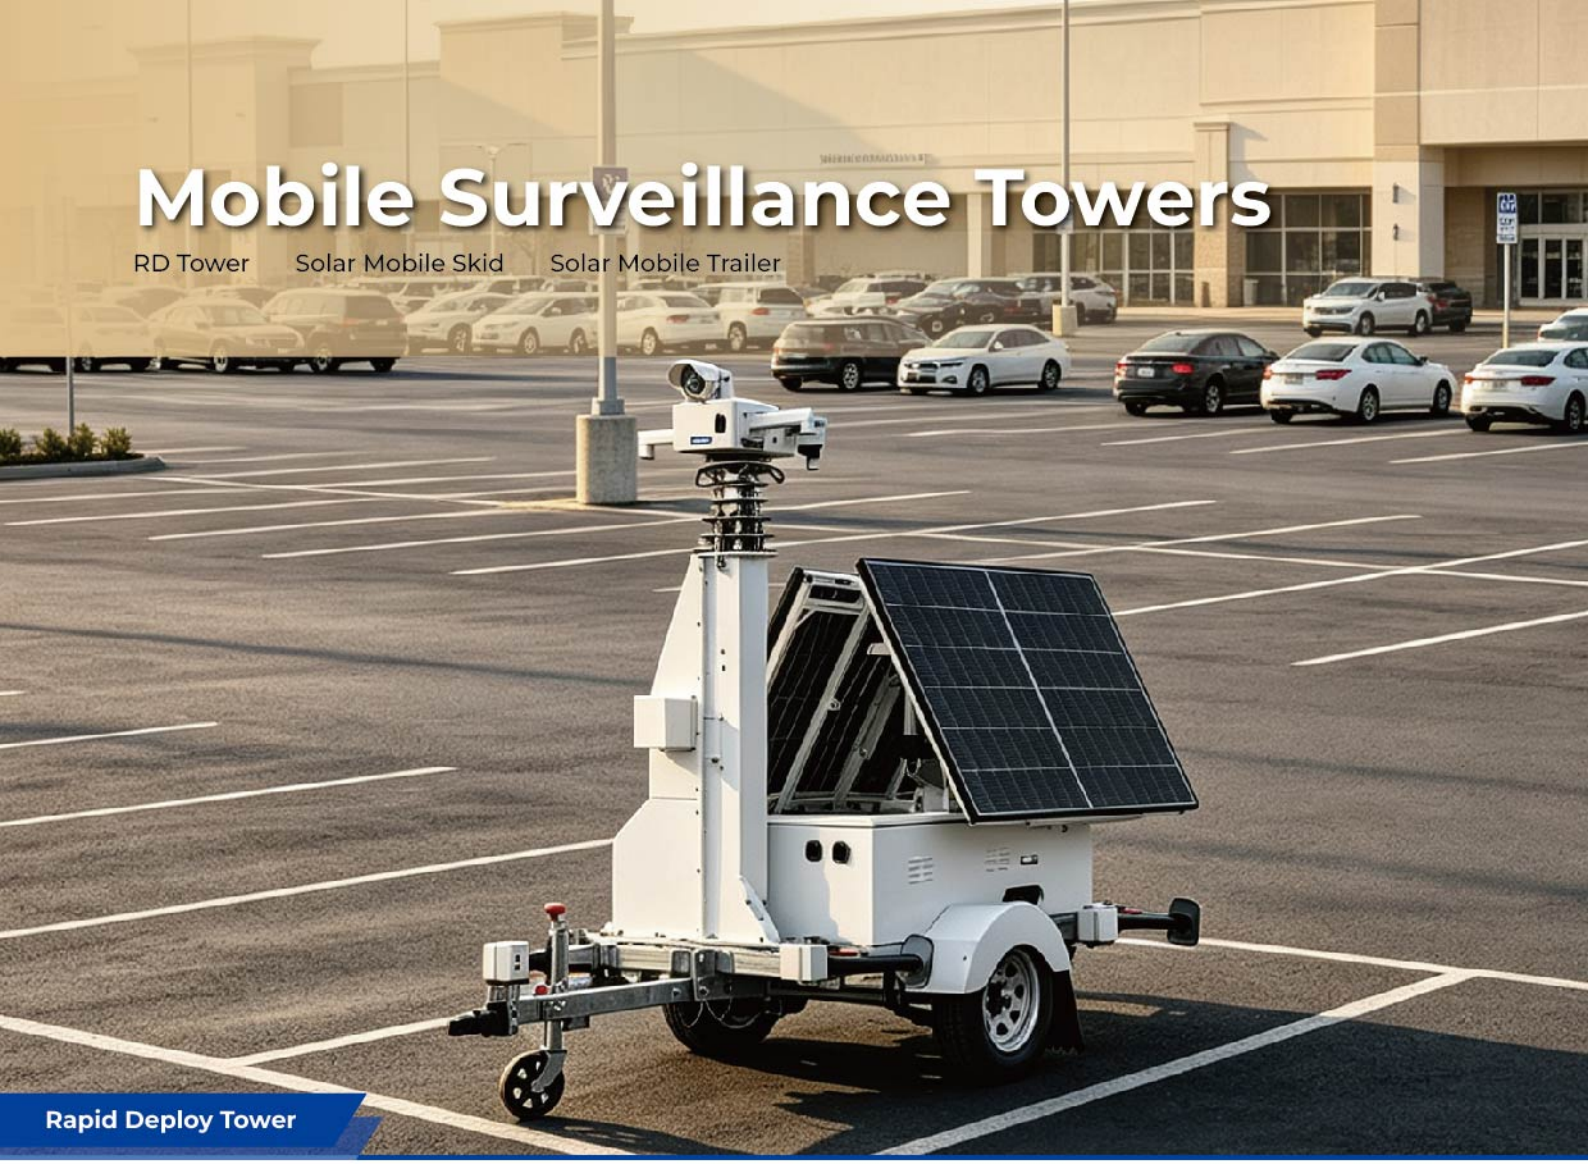

Mobile Surveillance Towers

RD Tower Solar Mobile Skid Solar Mobile Trailer

Rapid Deploy Tower

The GAGO Rapid Deployment Tower (RD Tower) is a portable solar-powered surveillance tower designed for fast installation and flexible outdoor security applications.

Combined with the GAGO DD3 Solar Surveillance Cabinet, the RD Tower creates a complete mobile solar surveillance platform that provides independent power, elevated camera positioning, and rapid deployment capability.

Solar Skid

GAGO Solar Skid — Deploy Power Anywhere.

- 600W Solar Input
- 4800Wh Energy Storage
- Victron Solar System
- Cloud-Based Remote Management
- Fast Deployment & Easy Maintenance

A modular solar power platform built for reliable outdoor surveillance and remote applications.

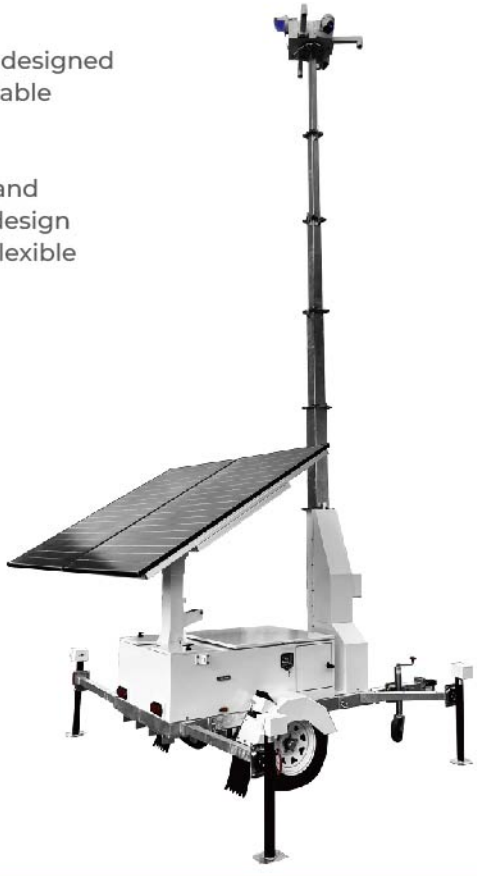

Solar Mobile Trailer

The GAGO ULTRA Mobile Trailer is a next-generation solar CCTV trailer designed for professional security applications requiring flexible deployment, reliable power supply, and intelligent remote monitoring capability.

Unlike traditional surveillance trailers that rely on oversized structures and limited customization options, the ULTRA combines a compact trailer design with high-capacity energy storage, advanced solar management, and flexible security integration.

Mobile Surveillance Towers

Outdoor construction sites/ Parking lots of large shopping malls

IP Smart Sensor

ONVIF Profile S | POE | WIFI | RJ45

The GAGO IP Vape Sensor (IP SMART SENSOR) is a patented intelligent detection device developed for modern security, environmental monitoring, and smart facility applications.

Unlike traditional vape detectors that focus on a single detection function, the IP SMART SENSOR is built on an advanced embedded system architecture and supports multiple detection modules within one compact IP device.
