Assembly Drawing-1

NOTE:

- Pre-assemble all components shown in this drawing.
- Pre-tighten all screws. Do NOT fully torque.
- Keep adjustment clearance for subsequent assembly steps.

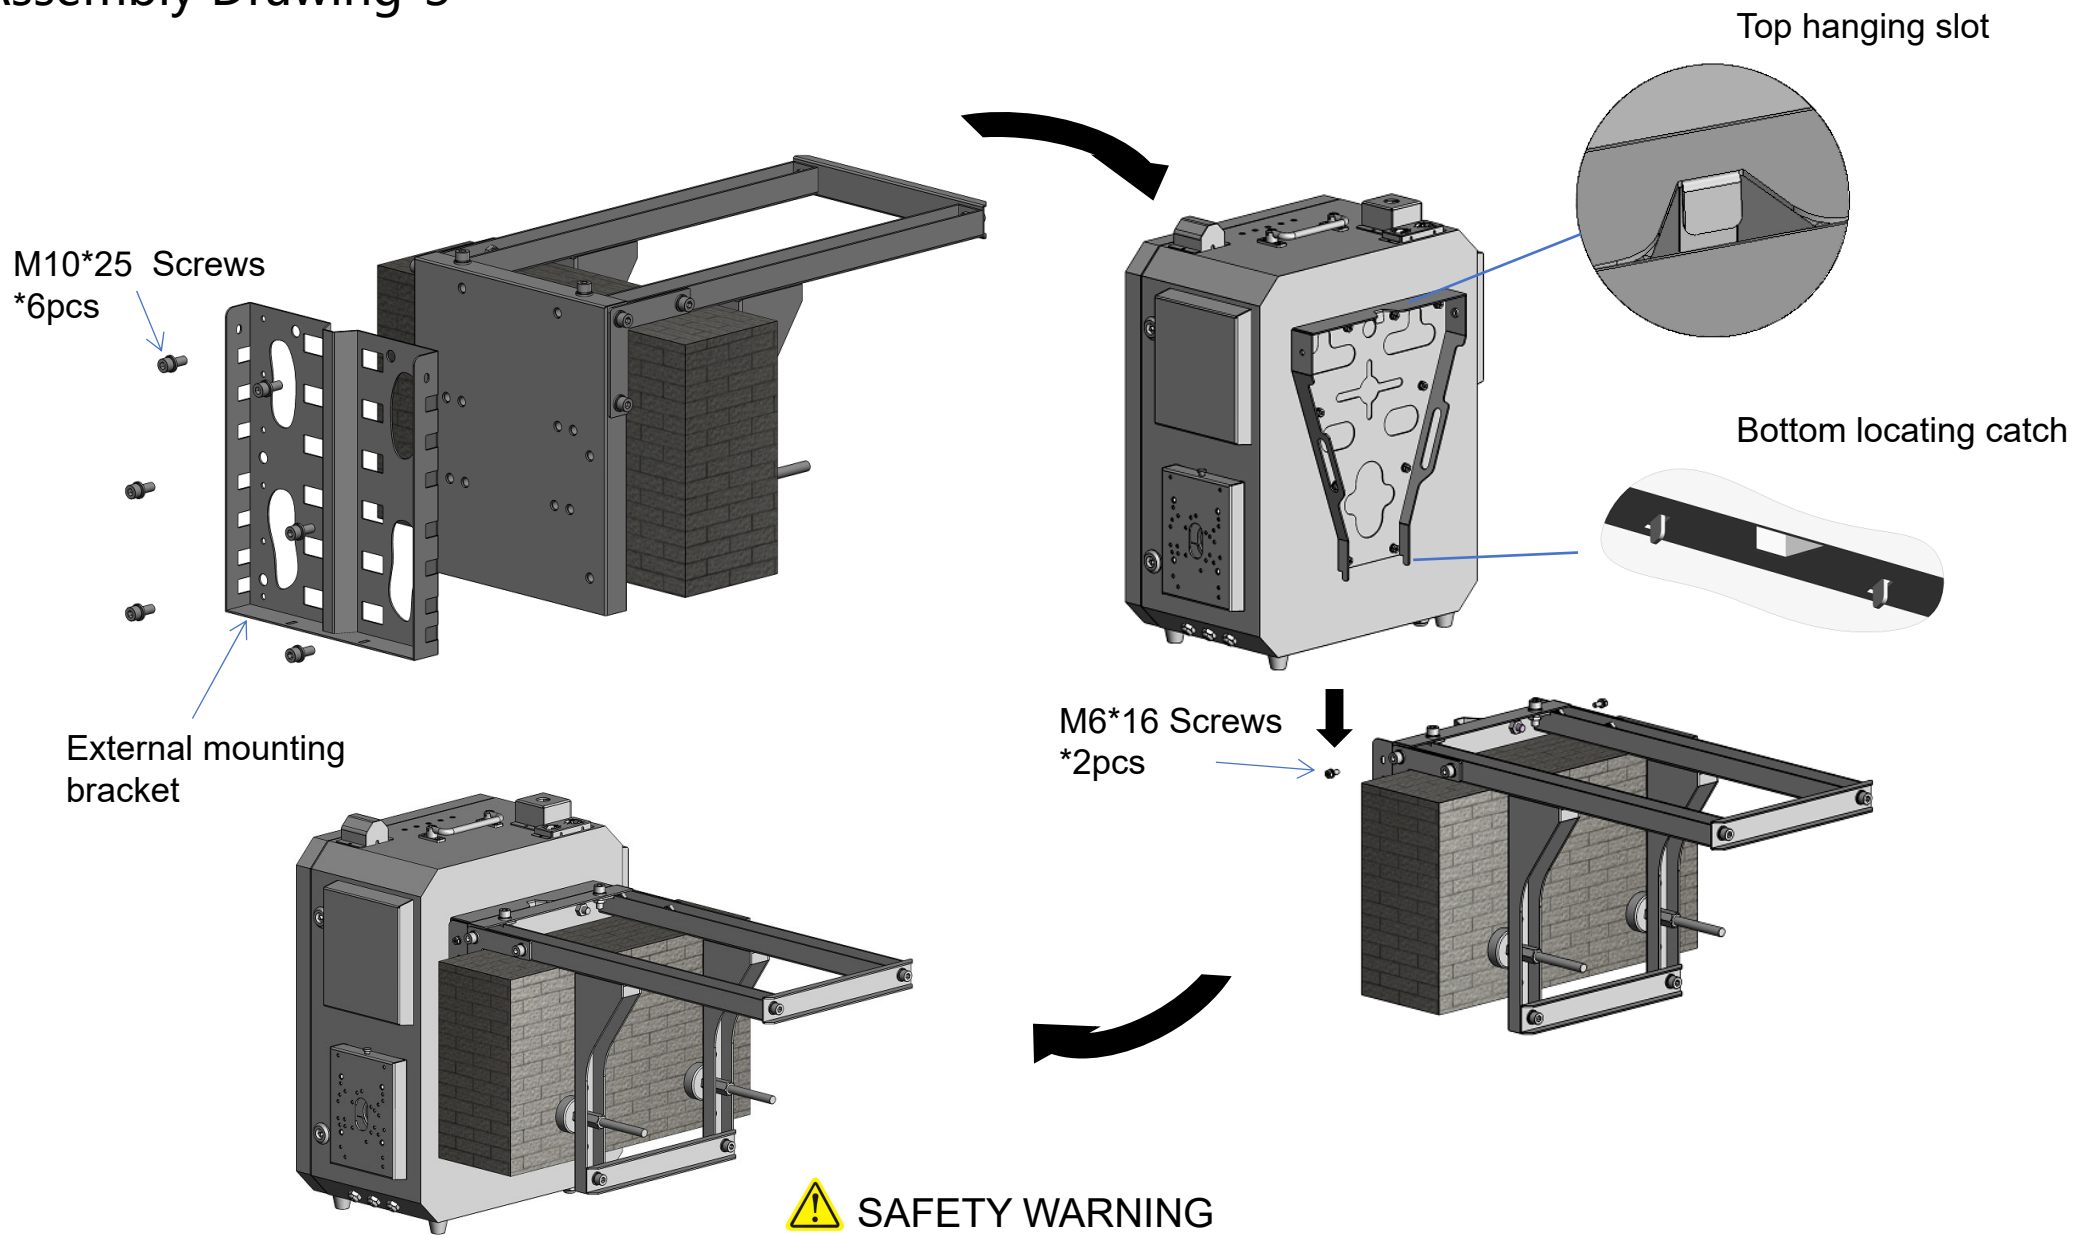

Assembly Drawing-2

⚠ SAFETY WARNING

- Wall thickness must stay within specified range. Out-of-range application will result in structural failure.
- Tighten screws and nuts to specified torque. Otherwise bracket may loosen and cause equipment falling hazard.
- After installation, verify bracket has no wobble or gaps. Do NOT mount equipment until inspection is passed.

Assembly Drawing-3

⚠ SAFETY WARNING

- When installing the unit, ensure the top hanging slot is securely hooked and the bottom locating catch is fully seated into the positioning hole.
- Tightening screws without full engagement will result in false mounting. Risk of unit falling, which may cause personal injury and equipment damage.
